CareTech services pty ltd

Media Release

Pre-Series A Capital Raising

PERTH, [05/07/2021] – **Caretech Services Pty Ltd** (CTS), WA-based intelligent packaging technology developer, today released details of its Pre-Series A Capital Raising.

CTS will raise $AU1m as it advances POC to commercial demonstrator MVP and scoping exercises, including field trials, of its innovative and transformational SIP System™ in selected settings.

The CTS technology integrates both SmartPack™s and the SIPApp™ into healthcare and veterinary supply chains and service delivery, saving lives currently lost through medication errors.

“This is a very exciting milestone for Caretech Services as we open up the company for others to participate in” said David Wearne, Executive Chairman of CTS.

“SmartPacks™ certainly deserve smart money, and I’m looking forward to working with those who wish to realise our vision of saving lives through digitising medical procedures”.

The proposal deck is available from the CTS website **www.caretech.net.au**
